

I am incredibly grateful to have received the bursary which helped aid my studies and enable preparation for potential future work as a qualified music therapist.

During my final year as a trainee music therapist, this bursary enabled me to reduce my days working as a primary supply teacher to one day a week. This allowed me more space and time to concentrate on my academic work whilst also being able to afford mortgage payments, train travel to South Wales from Surrey as well as one regular night's Welsh accommodation to attend the Music Therapy MA course in Newport .

In addition, the bursary paid for my Neurologic Music Therapy training course in Birmingham as well as associated costs. I look forward to a time when I can use some of the NMT training skills as a qualified Music Therapist.

The grant helped with my final fees and to afford invaluable weekly personal therapy sessions whilst working as a trainee therapist.

I have been able to purchase a better video camera which will aid and deepen my observations with clients.

May I thank you very much for your help, it is deeply appreciated.
